

Super Seal™ Cap Sealer

Innovative Technology

Our best-selling cap sealer range combines advanced features with a user-friendly design, delivering high-performance sealing in an entry-level automated production system.

Enercon induction cap sealers create hermetic seals that prevent leaks, preserve freshness and provide tamper evidence. The latest generation of the Super Seal™ range delivers the same trusted reliability, enhanced with innovative features never before available.

Super Seal™ cap sealers are available in three power levels with a variety of sealing heads to optimise sealing performance for your specific applications.

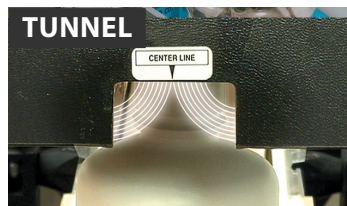

Features

- New display simplifies setup, operation & troubleshooting
- Advanced microprocessor control & IGBT circuitry
- High efficiency plug-in sealing heads
- Options for stalled containers, container back up & foil detection
- Local/Remote modes for start/stop & power level
- IP55 rated for washdown

Easy to use operator interface provides sealer operation and control status indicators as well as a menu driven display for advanced feature control.

Sealing Heads

Options

Foil caps should never sit idle under an active induction sealing head. Add these sensor packages to your system for additional safety:

STALLED BOTTLE DETECTION

Mechanically integrated sensors detect stalled containers & turn sealer off

BOTTLE BACKUP DETECTION

Detects container backups under sealing head and turns the sealer off if backup detected

Add Quality Control to your operation with these options:

FOIL DETECTION

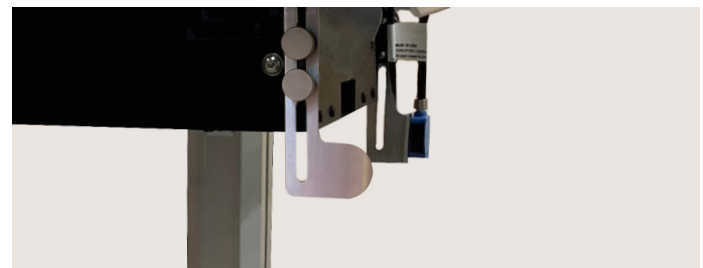

Ensures foil is present in every cap prior to sealing

STACK LIGHT

Provides a green light when the unit is operating correctly and a red light when no power is supplied to the sealing head. An 85dB audible alarm can also be added to the Stack Light.

VALIDATION PACKAGE

Includes the documentation required for IQ/OQ/PQ.

Mechanically integrated stalled container sensor package.

SPARE PARTS KIT

Be prepared with backup parts. Receive a discount when purchased alongside your sealer.

MOUNTING OPTIONS

Fixed floor or mobile stand:

- Stainless-steel stand
- Adjustable for different bottle heights
- Suitable for food or clean environments
- Optional wheels for ease of unit manoeuvrability
- Optional Digital Height Readout
