Simple Setup, Operation, & Troubleshooting with Integrated Intelligence

A new 7" touchscreen provides operators with setup, operation, & troubleshooting assistance. QR codes link to Enercon's support website for more details & the ability to start a support case if needed.

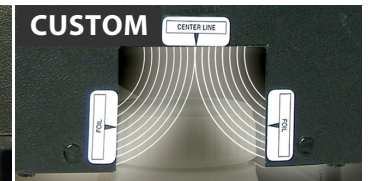

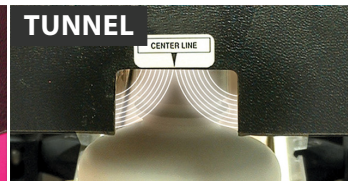

Smart Capture
Captures all critical operating data before and after a fault for diagnostic purposes. Like having a Service Engineer onsite with an Oscilloscope.

Additional Features

- Two power levels & universal input voltage (200V -240V)
- Remote start/stop and remote power control
- Network connectivity for remote control & monitoring
- Recipe management
- Multi-layer supervisory password protection
- Detailed fault, event & maintenance logging
- Stainless steel enclosure, IP55 – safe for washdown
- Designed for quick changeover
- Compatible with existing sealing heads

Energy Efficient Sealing Heads

Mounting Options

Fixed floor mount or mobile stand.

- Stainless-steel stand
- Adjustable for different bottle heights
- Suitable for food or clean environments
- Optional wheels for ease of unit maneuverability

Enercon systems are designed to operate in a maximum ambient temperature of 40°C (104°F) @ 80% relative humidity, non-condensing. Foil caps should never sit idle under an active sealing head.
